

## What Hills?

The UltraMotor A2B electric bikes provide an eco-friendly way to get from A to B. The battery will help boost you up those San Francisco hills and ensure that you're never left behind!

The future is here! The electric bikes each have high-tech batteries which can go up to 20 miles per hour! Zip along the new bike path by the Bay to Fort Point where you can enjoy a snack at the Warming Hut before proceeding up to the bridge. Then, just kick up the throttle on your eco-friendly electric bike and enjoy the effortless ascent to the Bridge without breaking a sweat. Take in the panoramic views of the City and the Bay as you bike over the Golden Gate Bridge! Then it's a fun downhill coast into Sausalito where you can enjoy great food, shops, and sunshine before heading back to San Francisco on the ferry boat. The new electric bikes will make your ride to Sausalito fun, easy, and eco-friendly. Go green and forget about those San Francisco hills!
